## Lethbridge Minstrels Coming to Champion

Under the auspices of the local Elks arrangements have been made to stage the Community Hall here on the night of Friday April 20th. The North Lethbridge Minstrels, consisting of boys who can't find work. But have used their talents to entertain you for a good two hours laugh. These boys have put this same show on four times in Lethbridge to packed houses. Bateman's seven piece orchestra comes along with the show and forms a real musical back-ground for all the acts. The orchestra will also play for a dance after the show. The Elks are planning seating accommodation for a packed house at the popular prices of 15c, 25c and 35c. So don't forget the date Friday night April 20th.

## Women's Institute

The April meeting of the W.I. at the home of Mrs. R. I. Baker was a complete success. Mrs. Claver gave an exceedingly amusing and complete report of the of the District number four conference held recently in Calgary. It was decided to arrange for a school clinic and a baby clinic. Mrs. Eastly, Mrs. Dawson and Mrs. Baker form the committee in charge. Mrs. Hagenman will visit the branch at the regular June meeting.

Mrs. Dawson then presented a Home Economics programme which in addition to being extremely interesting was quite enlightening. Its purpose was to advise women to make their work as easy as possible in order to have more time to rest and have a good time.

The lecture was presented by songs and readings as follows:  
Song, "The Shortest Way," Mrs. McLean.  
Song, "My Poor Tools" by Mrs. McLean.

"Grandmother Sherita Testimony," Mrs. Alcock.

Song, "Bessie Jones' body lies a mouldering in the grave," Mrs. C. McLean.

Reading, "Dad discover mother's talents," Mrs. Caldwell disguised as dad.

Song, "Believe me," Mrs. McLean.

"Helping Ma" recitation by three little girls and one boy.

A song was then sung by all the members and a couple of charming trios sung by Gladys and Ruth Anderson and Ada Williamson accompanied by Marjorie McCullough.

Delicious refreshments served by Mrs. Dawson and Mrs. Caldwell ended a very pleasant afternoon.

The May meeting will be in the Union church. Mrs. Stephenson is in charge of this programme. Mrs. Chalmers will be refreshment convener. The roll call, "Bright sayings of children."

## Report of Easter Supper

Receipts .....	\$29.50
Expenses .....	\$14.75
Balance .....	\$14.75

We wish to thank all who helped us in any way with this supper, specially the efficient committee and the young girls who so courteously waited on our guests.

Mrs. A. A. BAKER, President.

## Old Time Concert

Friday May 4th

The Ladies' Aid of Champion United church is planning to hold an Old-Time Concert, featuring local talent, in Campbell's Hall on the evening of Friday May 4th. Those of you who enjoyed the Irish concert last year will be glad, we are sure, to hear again many of the artists who performed so acceptably at that time. Watch for further announcements and don't forget the date—Friday May 4th. Admission 25¢ and 15¢.

## NOTICE

Will the person who took rear spring and 2 wheels off Ford car please return at once and save further trouble.

## The Biggest Success of The Season

The Clerville Pioneers fully maintained their reputation as entertainers on Friday evening, April 6th, when a crowd of over four hundred, including many from Carmangay, Barons, Stavely, Brant, Vulcan and Reid Hill gathered in the Community hall for an Old Time Fiddlers' Contest and dance. The three competitions namely, the Fiddlers' Contest, Best Old Time Dance Callers, and the Hog Calling Contest were naturally the outstanding factors in what proved a highly successful evening. The Champion orchestra provided excellent music for the occasion.

There were eight entries in the Fiddlers' Contest with the following results:

1st prize—Barney Hummel, 100 lb. sack flour. 2nd prize—T. Platt, Brant, 50 lb. sack flour. 3rd prize—George Matlock, 20 lb. sack sugar.

There were eight entries in the Dance Callers Contest with the following results:

1st prize—Orn Matlock, 100 lb. sack flour. 2nd prize—G. A. Fath, 50 lb. sack flour. 3rd prize—L. B. Ohlbeiser, 20 lb. sack sugar.

Judges for both contests were Cy Hopkins, Calgary, D.D. Farmer and J. C. Anderson.

The novel feature of the evening was the Hog Calling Contest, in which the ladies un-

derbly excelled. There were ladies and eleven men entered in the event, with the prizes going to Mrs. Walter Glen, Reid Hill, and Jack Thompson, Brant. Hams were the prize offered in this event.

The Old Timers are to be highly congratulated on the manner in which all phases of the programme were run off, and the efficient management in evidence throughout.

## Dramatic Festival At Vulcan April 23

Drama lovers of Champion will no doubt keenly anticipate the Dramatic Festival announced for presentation in the Vulcan theatre, on Monday evening April 23rd. Three one-act plays will be presented, and as a special attraction the Vulcan Concert Orchestra will provide prelude and interlude music. The three plays selected by various young people's groups are: "The Model Wife" by Helen F. Bagg, "Suppressed Desire" by Susan Chapal, and "Wanderlust" by Paul Halvey.

The first under the direction of Miss Mayme Lebeau, has for its scene an artist's studio in New York and is of the comedy type drama. "Suppressed Desire" is under the direction of Mrs. Wayne Ransome and is a short satirical play in two scenes. The third, "Wanderlust," has for its scene a family flat in the Bronx, New York. It is of the drama type and is under the direction of R. D. McElroy.

Friday evening, April 6th, claimed Mrs. C. A. Williamson as a dinner hostess, when she entertained in honor of Miss Verena James of Lethbridge. Snapsdragons and caratons carried out the Easter motif on the daintily arranged table, where covers were laid for ten. Mrs. Williamson was ably assisted by Mrs. A. McCullough. Guests included: Misses Verena James, Ruth Anderson, Gladys Anderson, Helen Collins, Ada Williamson and Messrs. Alex Latiff, Harry Taylor, Robert McCullough, Philip Bastin, Max Caldwell. The young people later attended the hog-calling contest and dance held in the Community hall.

## Finest Quality Reasonably Priced

Marvels of the Human Eye  
By F. M. CROWE, Optometrist-Optician, Calgary

NO. 3-CATARACT

Much ignorance exists as to what a Cataract really is. A great many people think it is a growth of some kind on the outside of the eyeball which can be seen by the naked eye—but such is not the case.

A Cataract is that condition of the eye in which the Crystalline Lens has, from various causes, lost its former transparency thus preventing the rays of light from passing through it unimpeded and forming a clear image on the retina. This loss of transparency usually progresses very slowly. Sometimes it starts from a single point or nucleus and gradually spreads throughout the whole lens while in other cases the entire lens is involved at the same time. The latter case is very difficult, even for an expert with instruments, to recognize it in the early stages but as and when it continues to progress, the lens becomes more and more cloudy or "milky". The retina becomes more difficult to observe (with instruments) and finally when the lens has become "ripe", the pupil instead of being black is grey, which can be seen by anyone without the aid of instruments.

At that condition then, in which the lens has become cloudy is known as a Cataractous Lens or Cataract and it will not afford much assistance, in fact, as the condition changes, the lens becomes more and more opaque, the effect of changing of the glasses worn will eventually the lens having become opaque, the effect of the convex glasses formerly worn is neutralized and such people can read better but not satisfactorily. The glasses then with those formerly worn, the effect of the convex glasses of "second sight" originated. There is no such condition in normal life systems, it is only a condition of experience was it or due to the above causes. It is not a disease, however, to make many people believe this. They insist in all sincerity that to wear them, hence he must have got his "second sight". In the

first place such people have no means of knowing the percentage of normal vision such a relative possessed at any time of life and the only foundation for their belief is that the vision before death could see better without glasses than with them—the explanation of which I trust I have made clear. Do not hope that you will ever "get your second sight". Occasionally both eyes are simultaneously affected but usually the opacity appears in one lens years in advance of the other but eventually both eyes become diseased. When the Cataracts have become "ripe" the patient has difficulty in distinguishing daylight from darkness and in proportion to the progress of the disease, dimness of vision follows for which glasses are of little or no avail. Patient sees as if he were in a fog or as if a film is before the eyes. He usually has an aversion to bright light and in fact prefers a dark or cloudy day because he sees better and more comfortably. It is unfortunately not true that an inflammatory condition to the eyeball.

Technically there are several varieties and the causes are many. There is the Senile due to extreme old age but fortunately for very old people are afflicted. Injury to the eyeball at some time of life is a common cause while certain diseases of the body have a tendency to produce it. It is a disease of the eye. There is no medicine, exercise or other "cures" for Cataracts although much money and time with resultant sorrow, have been spent by people who have fallen into the hands of the faker (usually a quack) who literature who has promised cures. Surgery, performed by a skillful operator, when the Cataract is "ripe" is the only sound method when the opaque Crystalline Lens has been so seriously affected that the removal and proper glasses supplied, there is nothing to prevent the rays of light from passing into the eyes and focusing on the Retina and very often one hundred per cent. vision obtainable.

## European Travel Costs Lower

Reduced Railway Fares As Well As Hotel Rates

Contrary to a wide-spread impression, European travel costs this year, despite foreign exchange rates, are actually lower than they were in the peak travel year of 1926, according to the Cunard & Anchor-Donaldson Lines.

This fact is revealed in the inclusive tour costs of the big travel agencies and the reduced fares on railways, automobiles and hotels. Private automobiles can be hired at a much lower price, the costs being reduced by 44% in Paris and in Rome by 46%, with comparative reductions in other countries.

Hotel rates average 36% less all over Europe than they were in 1926. In Paris the reduction is 33½%, in London 21%, in Nice 26%, in Genoa 66%, in Rome 60%, in Naples 60%, in Lucerne 23%, in Switzerland 40%, in Heidelberg 23%, in Cologne 35%, in Amsterdam 41%, and in Brussels 35%.

Railway fares have been lowered in many countries. In Holland, for instance, the reduction has been as much as 22%, in France 30%, in Poland 30%, in Switzerland 30%, in Germany 25%, and in Belgium 25%.

Taxis have come down considerably in Amsterdam, for instance, a taxi ride, regardless of the distance covered, costs you only 25¢, half as much as in 1926.

Organized sight-seeing tours in Europe are considerably reduced. In Paris, they are 25%, in Nice 26%, in London 14%, in Brussels 22%, in Rome 25%, and in Heidelberg 37% less than in 1926.

These reductions more than offset any unfavourable effect of high exchange operating in some countries.

## To Assist Livestock Industry

Want Reports On Detrimental Practices Of Livestock Buyers

To assist him in the presentation of the important information respecting the livestock industry to be submitted by joint representation of the government of the prairie provinces, Hon. W. C. Buckle, minister of agriculture for Saskatchewan, is desirous of having farmers interested in the production and marketing of livestock, report any specific example of where the producer is not the recipient of full market value for his livestock, or where the trade practices or other defect in the present system of marketing livestock. All statements should be accompanied by documentary proof, and the facts are valuable when based upon facts, but without them, are useless in a case of this kind.

It is expected that joint representations from the prairie provinces will be submitted to the Parliament, Ottawa, very shortly. The Livestock Association and the Livestock Pool, have been invited to present available data to Hon. Mr. Buckle to be incorporated in a joint statement on behalf of the three prairie provinces.

Where News Travels Slowly  
The Russian "Tribune" reports that a Christmas message to the late Czar and his family was received in Leningrad the other day. It came from a Siberian tribe which had not yet heard of the Russian revolution.

## Most Intelligent People

Dr. (Dr.) Fisher, psychology professor at Columbia University, has found that persons born in January, February or March are inclined to be less intelligent than those born later in the year. He bases his conclusions on studies of 20,000 school children.

Farmers of the Netherlands are welcoming the payments by the government from its agricultural crisis fund.

There are more than 200 products of petroleum.

women report benefit. Let it keep  
you true.

## Device Beats Stop-Watch

Claimed To Clock Athletes Within  
Hundredth Of Second

A device whereby, it is claimed, it will be possible to clock athletes within one hundredth of a second has been invented by Dr. E. L. Harrington, head of the department of physics at the University of Saskatchewan. It applies the principle of the electric clock.

The new timer is said to be 20 times more accurate than a stop-watch. It calls for a 12-tooth wheel, placed between magnets attached to Saskatchewan's electric power system. The alternating current of the system provides 120 impulses per second and the wheel would revolve 12 times a second. Each impulse would move a counter like a speedometer, attached to the wheel, which automatically records the time between two pressures on a clutch. It can be read within a tenth of a revolution.

Up to the physicist head has used the machine in his laboratory to record the gradually decreasing energy of the radiations from radium.

OFF COLOUR?  
HOW IS YOUR LIVER?

Wake up your Liver Bile  
—Without Calomel

Your liver is a very small organ, but it is one of the most important in your body. It filters out all the poisons from your blood and sends them out of your body. If your liver is not working properly, you will feel tired, sluggish, and your skin will become yellow. You will also have a bad taste in your mouth and your breath will be bad. You will feel that you are not getting any sleep and you will be very nervous. You will also have a headache and your eyes will be red and watery. You will also have a loss of appetite and you will not want to eat. You will also have a loss of weight and you will feel very weak. You will also have a loss of energy and you will feel very tired. You will also have a loss of interest in life and you will feel very depressed. You will also have a loss of hope and you will feel very despairing. You will also have a loss of faith and you will feel very doubtful. You will also have a loss of love and you will feel very lonely. You will also have a loss of respect and you will feel very ashamed. You will also have a loss of honor and you will feel very disgraced. You will also have a loss of dignity and you will feel very humiliated. You will also have a loss of pride and you will feel very humbled. You will also have a loss of self-respect and you will feel very degraded. You will also have a loss of self-love and you will feel very despised. You will also have a loss of self-honor and you will feel very dishonored. You will also have a loss of self-dignity and you will feel very debased. You will also have a loss of self-pride and you will feel very debased. You will also have a loss of self-respect and you will feel very degraded. You will also have a loss of self-love and you will feel very despised. You will also have a loss of self-honor and you will feel very dishonored. You will also have a loss of self-dignity and you will feel very debased. You will also have a loss of self-pride and you will feel very debased.

## Increased Demand For Rubber

Modern Motor Cars Using More  
Than Ever Before

The yearly output of from 20 to 40 rubber tires is required to supply tires, tubes and parts for each modern car, according to American engineers. In 1925 the average car in addition to the rubber in tires and tubes, while 1933 models carry from 30 lbs. to 60 lbs. of rubber parts. More than 90 per cent of the motor cars use at least 20 lbs. to 40 lbs. of rubber made up into 11 or 12 classes of parts, ranging from spark plug caps and door bumpers to torque spring insulators and engine mountings.

Of 18 swimmers, including nine women, who attempted to swim the English channel in the summer, only one, a woman, was successful.

Winds on some of the stars are terrific gales.

## "Fresh from the Gardens"

## The Western Economic Outlook

Writing in "Agricultural and Industrial Progress in Canada", Mr. John P. Sweeney, Industrial Commissioner, Western Lens, Canadian Pacific Railway, declares that confidence in the outlook for 1934 business is the dominant feature of the Western situation. Signs are not lacking in many parts of Canada that we are slowly emerging from the depression of the past four years. Improvement appears to be more noticeable in the Eastern parts of Canada, where some acceleration is apparent in the manufacturing industries. In the West where we depend almost entirely on agriculture recovery will necessarily be more slow in coming. As a matter of fact we cannot hope for any great degree of prosperity whilst agriculture languishes. A good crop, fair prices for our wheat, and a market for our products are the needful factors. Mr. Sweeney says that improvement in the trade, together with the realization that an upturn is now noticeable, has brought back the more satisfactory feeling that it is possible to consider that a period of trade and industrial expansion is, to a moderate degree, justified. Anticipated during the last few months, it is not difficult to venture the statement that every effort is being put forth to increase the volume of business throughout the West by methods that are most likely to react favorably.

It is, of course, too early to state what programme of new development is likely, though enquiries towards the end of last year appeared to indicate that some industrial expansion of note might take place during the present year, and that there may be more money available for building operations of all kinds. This situation, there should certainly be a distinct improvement over 1933 if necessary requirements are to be met in the erection of houses and commercial buildings, quite apart from any factory expansion. Any programme of moderate size would seem possible in the lumber market, which has been nearly at a standstill for some time, though the export business has been showing important increases.

The mining industry is looking for a steady improvement, and activities in relation to development would show a considerable increase in this respect. In British Columbia, Manitoba and western Ontario work continues on an increasingly larger scale, which will bring some important properties into production during the present year.

The Western agricultural situation is a matter of constant study of ways and means to bring it to a more stabilized level but, in the meanwhile, the Western agriculturist is bent on carrying on with ever-improving methods in the production of grain and livestock, having in view that ultimately his returns will justify confidence in Western Canada and its products. This is considered to be a reasonable attitude that will eventually realize greater value for farm products, more especially as the major effort is towards a higher standard that will meet export market requirements. This is already showing results that further the belief that the correct course is being followed.

In Alberta and to some extent in Saskatchewan and Manitoba, drilling for oil and gas is to be continued. The Alberta programme is, in considerable size, according to present indications, the more southern field getting the larger share of the proposed operations.

The sodium sulphate industry of Saskatchewan increased its production during 1932, and anticipates a further increase in output during the present year. The clay areas of southern Saskatchewan continue to cause interest, awaiting further development at such time that capital and growing markets are available.

The fishing industry has been the subject of the three Prairie Provinces is being fully investigated in order that the marketing of the products of these lakes may possibly be put on a better footing, and efforts are being made to expand the marketable areas for whitefish, as well as for other classes of fish that are available in large quantities from the fresh water lakes of the West.

## Report Finding Of

## King Solomon's Mine

Rhodesian Prospector Refuses To  
Give Exact Location

Finding of King Solomon's mine, search for which has been going on for years, has been reported by a prospector in Broken Hill, Northern Rhodesia. He declares that he has discovered it while following a wounded buck, but refuses to give the exact location except that it is in the centre of a mine concession. For more than 300 years this mine has been searched for the legendary mine. In Solomon's day it was said to be so fabulously rich in gold that silver became of little value in his court. The search has gradually narrowed down to an area of about 250,000 square miles. Within this area, the prospector has been searching for many natives in an effort to extract information about it and many Portuguese tramped hundreds of miles in search of it.

## Large Enough Anyway

Elephants as security were recently  
offered by an American showman,

who asked for a government loan to rehabilitate his broken-down circus. The security he offered was a mortgage on three elephants.

## Cleveland is probing a purchase

whose books show 24,000 gallons of

## SHE LOST 32 lbs.

New Frocks No Longer  
Worried Her

"How did she lose that 32 lbs. of fat?" is what you will be asking. Let her tell you herself—  
"About 18 months ago I weighed 178 lbs.—which I can assure you annoyed me very much. Everything I ate seemed to go straight into new clothes. Nothing would fit me comfortably, and walking was unbearable. I was advised by a friend to try Kruschen Salts, and I am very glad I did so. During the first ten months I lost 28 lbs. of fat. Now, for the last 6 months my weight has been 146 lbs., and I feel much better in health. I have all my weight lost. I am a new woman."—(Mrs.) M. P. Kruschen.

Kruschen helps blood, nerves, glands and body organs to function properly—you gain new strength and energy—feel your younger—look better, work better.

## Hog Raising A Specialty

Dunrobin, Parn, near Beaverton, Ontario, on Lake Simcoe, has been in operation for 14 years, five generations have been bred. The Gurn family, Brig-General John A. Gurn now being in charge. It comprises 500 acres and a specialty is made of raising hogs. A herd of 45 milking Holsteins and 35 heifers and heifer calves, forms the dairy force, and four rows of hog pens house 275 Yorkshire, of which 27 were brood sows, and 220 hogs were marketed last year.

CANT SLIP OR SLIDE  
FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable one which only dentists prescribe such as Dr. Wernert's Powder—the largest seller in the world—your teeth so secure yet comfortable they feel natural—your confidence assured all day long. For a special comfort cushion to protect and soothe gums. No colored, gum paste—keeps natural healthy—brilliant—long-lasting—irresistible—irreversible.

## Local & General

Preparations for seeding have become general this week. Several farmers are busy cultivating and a few have already commenced seeding. There seems to be a tendency to delay seeding however in order to combat weeds. Several new tractors have been purchased this spring.

Mrs. D. Watkins and Mrs. M. Clever motored to Lethbridge Saturday to visit Mrs. A. Lyons, who is a patient in the Galt hospital, suffering from severe injuries received in a recent car accident.
